EXPLORATION AND PROJECTS

Tapanahony Property

The Tapanahony Gold project covers 29,000 hectares of significant artisanal mining and historical exploration with an excellent database that includes airborne geophysics, multiple phases of semi-quantitative panning of drainages, large auger grids, mapping and sampling of small-scale mine workings, and 4,000 metres of drilling. There are multiple gold targets within the project area that range from large gold in soil anomalies to those that have had limited drilling. Historical results on each target suggest additional exploration is warranted.

Suriname has been a focal point for successful gold exploration for decades and is internationally recognized as being mining friendly. The country is politically stable and is governed under European-based rule of law. Suriname is underlain by the Guiana Shield, which stretches through Guyana to the west and French Guiana to the east. The Guiana Shield is a productive greenstone belt that is home to 15 major gold mines, including the 13.4 Moz Rosebel Mine and the 7 Moz Merian Mine located in Suriname.

On November 8, 2024, the Company signed a Binding Letter of Intent to acquire an interest 1494741 B.C. Ltd ("149 BC") and its wholly owned subsidiary, OL Sranan Gold N.V. Upon signing the Binding Letter of Intent, the Company paid \$210,525 (US\$150,000) as an exclusivity fee. 149 BC and Sranan are parties to a Binding Letter of Intent to acquire a 90% interest in certain gold concessions of the Tapanahony Gold Project (the "Project") in Suriname, South America with an option to purchase the remaining 10%.

On February 21, 2025, the Company entered into a definitive agreement (the "Agreement") to acquire 100% interest in 149 BC. The acquisition of 149 BC will be completed by way of the acquisition of all the outstanding equity interests of 149 BC (the "Acquisition").

Pursuant to the Agreement, the Company issued 6,000,000 common shares in the capital of the Company to the shareholders of 149 BC in exchange for all the issued and outstanding common shares of 149 BC. The Company will issue an additional 6,000,000 Consideration Shares to the shareholders of 149 BC on a pro rata basis in proportion to their former respective holdings of 149 BC upon completion of drilling of an aggregate of 5,000 meters on the Project.

The Acquisition is an arm's length transaction and subject to customary conditions associated with such a transaction. No finder's fee is payable in connection with the Acquisition.

Pursuant to the Agreement, the Company will assume all the obligations of the \$1,350,000 cash and 1,800,000 common shares scheduled over the courses of 60 months to acquire a 90% interest in the Project.

Aida Property

On June 8, 2021 the Company entered into an agreement to acquire up to a 75% interest in six mining claims in the Kamloops Mining Division, British Columbia. To acquire a 51% interest, the Company issued 100,000 common shares (issued for \$2,000) and made a cash payment of \$5,000 to the vendor.

To earn a further 24% (for a total of 75%), the Company must pay the vendor \$5,000 on or before June 8, 2022 (paid), issue 100,000 common shares on or before the first anniversary of the initial listing of the Company's shares on an exchange (issued), and incur aggregate exploration expenditures of \$200,000 of which \$75,000 must be incurred before June 8, 2022 (incurred) and \$125,000 on or before the first anniversary of the initial listing of the Company's shares on an exchange. Effective September 28, 2023, the vendor has waived the requirement of the \$200,000 aggregate exploration expenditure.

The property is subject to a net smelter return royalty of 2% payable to the vendors.

The Aida Property is located in the Kamloops Mining approximately two kilometres South of Salmon Arm in the southern interior of British Columbia. The Property consists of five mineral claims covering an area of 2,335 hectares.

The Aida Property is in a relatively undeveloped area. Since 1920, exploration has been limited to prospecting, sampling, trenching and geophysical surveys. The programs have identified potential zinc, lead, and silver deposits.

An independent geological report (the “Technical Report”) prepared by Derrick Strickland, P. Geo. who is a “Qualified Person” as defined in National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”), was completed in relation to the Property on October 2, 2021. The Technical Report recommends that the Company conduct further data compilation and geophysical analysis and a surface exploration and trenching program.

Future Plans

The Company intends focus its efforts in an exploration program on the Tapanahony Project in Suriname. Additional exploration targets have been identified by small-scale miners, geophysics, Lidar and geochemical sampling.

LIQUIDITY AND CAPITAL RESOURCES

The Company reported working capital of \$1,895,666 as at March 31, 2025 including cash of \$1,710,310. Current liabilities as at March 31, 2025 consisted of accounts payable and accrued liabilities of \$36,939.

RISKS AND UNCERTAINTIES

The Company's principal activity is mineral exploration and development. Companies in this industry are subject to many and varied kinds of risks, including but not limited to, environmental, metal prices, political and economical. The Company has no producing properties, no significant source of operating cash flow and consequently no sales or revenue from operations. The Company has either not yet determined whether its mineral properties contain mineral reserves that are economically recoverable or where reserves have been determined, mining operations have not yet commenced. The Company has limited financial resources. Substantial expenditures are required to be made by the Company to establish reserves.

The property interests in whom the Company has an option to earn an interest are in the exploration stages only, are without and may not result in any discoveries of commercial mineralization, and have no ongoing mining operations. Mineral exploration involves a high degree of risk and few properties, which are explored, are ultimately developed into producing mines, the result being the Company will be forced to look for other exploration projects. The Company is subject to the laws and regulations relating to environmental matters in all jurisdictions in which it operates, including provisions relating to property reclamation, discharge of hazardous materials and other matters.
