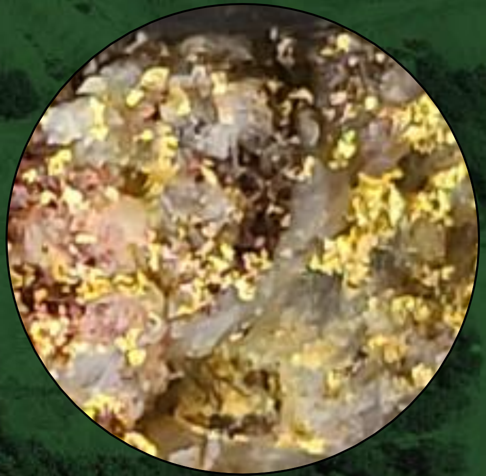
SRANAN GOLD

# Exploring the Heart of Suriname's Modern-Day Gold Rush

August 2026



# Forward Looking Statement

**Legal Disclaimer**

This presentation of Sranan Gold Corp. ("Sranan" or the "Company") is for information only and shall not constitute an offer to buy, sell, issue or subscribe for, or the solicitation of an offer to buy, sell, issue or subscribe for any securities in any jurisdiction. The information contained herein is subject to change without notice and is based on publicly available information, internally developed data and other sources. Where any opinion or belief is expressed in this presentation, it is based on the assumptions and limitations mentioned herein and is an expression of present opinion or belief only. No warranties or representations can be made as to the origin, validity, accuracy, completeness, currency or reliability of the information. The Company disclaims and excludes all liability (to the extent permitted by law) for losses, claims, damages, demands, costs and expenses of whatever nature arising in any way out of or in connection with the information in this presentation, its accuracy, completeness or by reason of reliance by any person on any of it. This presentation should not be construed as legal, financial or tax advice to any individual, as each individual's circumstances are different. Readers should consult with their own professional advisors regarding their particular circumstances. There are certain risks inherent in an investment in the securities of the Company that prospective investors should carefully consider before investing in the securities of the Company.

**Forward-Looking Statements**

This presentation contains "forward-looking information" within the meaning of applicable Canadian securities legislation and "forward-looking statements" within the meaning of applicable United States securities legislation, together, "forward-looking statements". Such forward-looking statements contain known and unknown risks, uncertainties, and other factors that may cause our actual results, performance, or achievements, or developments within our industry, to differ materially from the anticipated results, performance, or achievements expressed or implied by such forward-looking statements. Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words "expects", "aims", "plans", "anticipates", believes", "intends", "estimates", "projects", "potential", and similar expressions, or that conditions "will", "would", "may", "could", or "should" occur. Forward-looking statements included in this presentation include, but are not limited to: statements with respect to the Company's expectations regarding drilling and exploration activities on properties in which the Company has or may acquire an interest; and information with respect to the Company's continued exploration programs (including size and budget). Information inferred from the interpretation of exploration results and information concerning potential mineralization may also be deemed to be forward-looking statements, as such information constitutes a prediction of what might be found to be present if a project is actually developed. There can be no assurance that such statements will prove to be accurate. Actual results and future events may differ materially from those anticipated in such statements and readers are cautioned not to place undue reliance on these forward-looking statements that speak only as of their respective dates. Important factors that could cause actual results to differ materially from the Company's expectations could include among others: risks related to fluctuations in mineral prices; uncertainties related to raising sufficient financing to fund planned work in a timely manner and on acceptable terms; changes in planned work resulting from weather, logistical, technical, or other factors; risks associated with emerging and developing markets; the possibility that results of work will not fulfill expectations and realize the perceived potential of the properties in question; political uncertainty and other risks of doing business in Suriname; the Company's inability to obtain property rights and interests as currently proposed or at all; uncertainties in the estimation of any potential future mineral resources or reserves; the possibility that required permits may not be obtained in a timely manner or at all; the possibility that capital and exploration costs may be higher than estimated and may preclude or render future exploration and development uneconomic; risk of accidents, equipment breakdowns or labour disputes or other unanticipated difficulties or interruptions; the possibility of cost overruns or other unanticipated expenses in work programs; the risk of environmental contamination or damage resulting from the Company's operations; risks associated with title to mineral properties; and other risks and uncertainties discussed elsewhere in the Company's documents made publicly available from time to time. These statements are based on a number of assumptions; including assumptions regarding general market conditions, the availability of financing for proposed transactions and programs on reasonable terms, and the ability of outside service providers to deliver services in a satisfactory and timely manner. Forward-looking statements are based on the beliefs, estimates, and opinions of the Company's management on the date the statements are made. Except as expressly required by applicable securities laws the Company undertakes no obligation to update these forward-looking statements in the event that managements beliefs, estimates, opinions or other factors, should change.

**Public Data**

This presentation also contains or references certain industry data which is based upon information from independent industry publications, market research, analyst reports and surveys and other publicly available sources. Although the Company believes these sources to be generally reliable, such information is subject to interpretation and cannot be verified with complete certainty due to limits on the availability and reliability of raw data, the voluntary nature of the data gathering process and other inherent limitations and uncertainties. The Company has not independently verified any of the data from third party sources referred to in this presentation and accordingly, the accuracy and completeness of such data is not guaranteed.

**Qualified Person**

Mr. Michael Dufresne, M.Sc., P.Geol., P.Geo. is a "qualified person", as defined under National Instrument 43-101, for Sranan's exploration projects in Suriname. Mr. Dufresne, who is considered independent of the Company, has reviewed and approved the scientific and technical information in this presentation.

# Sranan Gold – The "New" Surinamese Gold Explorer

- Sranan Gold - New Surinamese gold explorer established in early 2025
- Experienced management team with an established history in Suriname
- Two Active Exploration Campaigns
  - Tapanahony Project – 29,000 ha / active since mid-2025
    - 2 drill rigs turning with ~6,300 m drilled, assay results reported
  - Lawatino Project - 18,468 ha / active since early-2026
    - 2 new gold zones discovered with first reconnaissance sampling assay results
    - Preparing for diamond drilling

# A Management Team Built for Success

## Oscar Louzada

CEO & DIRECTOR

Resource-focused executive with over 25 years international experience, including the past 12 years in Suriname.

Previously worked with Beeson Gregory (Investec) and Canaccord Genuity helping finance numerous exploration and development companies in the natural resources sector with a particular focus on South America, Central Asia, Africa and Europe.

Has been a principal of three natural resources companies: exploration in Suriname gold (Sumin Resources); production of fertilizer (Uzbekistan); and an 8,000 tpa copper cathode production company in the US (Idaho).

Fluent in Dutch, the primary language of Suriname.

## Jonathan Yan

CFO & COMPANY SECRETARY

Experienced in Accounting with over 13 years of experience in audit and accounting for various private and publicly listed Canadian companies.

Currently the Chief Financial Officer of Algo Grande Copper Corp (TSXV: ALGR) and Alset AI Ventures Inc. (TSXV: GPUS).

Was a Director and Chief Financial Officer of Sranan Gold Corp. (formerly Peak Minerals Ltd) (CSE: SRAN) from May 2023 to April 2025 and returned as the Chief Financial Officer of Sranan Gold in April 2026.

Holds a CPA, CA designation in addition to a Diploma in Accounting and a Bachelor of Science Degree from the University of British Columbia.

## Rayiez Bhoelan

VP OF EXPLORATION

Experienced exploration geologist with over a decade of Guiana Shield exploration specializing in structural controls of complex orogenic gold deposits.

Formerly responsible for driving greenfield exploration, geochemistry, and field mapping for IAMGOLD’s Suriname regional exploration and key team member at IAMGOLD’s Pikin Saramacca project; fast-tracked exploration towards 1.5 million ounces of P&P gold.

Held senior roles with Omai Gold Mines and other companies and former senior consulting geologist at Founders Metals Inc.

Part-time lecturer in geochemistry at Anton de Kom University of Suriname.

# Experienced Support and Direction

**Mario Stifano**
**Independent Director & Audit Committee Chair**

Seasoned mining executive and Chartered Professional Accountant with 25 years of experience across exploration, development, and producing mining companies. Currently CEO of Galantas Gold and Executive Chairman of Doré Copper Mining Corp., with prior senior leadership roles including CEO of Cordoba Minerals, Executive Chairman of Mega Precious Metals, and VP & CFO at Lake Shore Gold and Ivernia. Instrumental in raising $700M+ to advance mining projects, including leading the team that acquired, financed, and listed the historic Omai Mine in Guyana in 2020.

**Ron Halas**
**Independent Director**

Canadian mining engineer with more than 35 years of international experience including 5 years in Suriname as IAMGOLD's Vice President, Commercial - South America. He was an integral part of the team that negotiated for the acquisition of the Saramacca concession for IAMGOLD's Rosebel Gold Mine. As CEO of Global Atomic Corp., Mr. Halas advanced the Dasa uranium project from PEA to mine development in approximately 2.5 years, and as COO of Lumina Gold Corp., he delivered the Cangrejos feasibility study ultimately leading to Lumina's $581 million sale to CMOC Group Limited in 2025.

**Oscar Louzada**
**CEO and Director**

Resource-focused executive with over 25 years international experience, including the past 12 years in Suriname. Previously worked with Beeson Gregory (Investec) and Canaccord Genuity helping finance numerous exploration and development companies in the natural resources sector with a particular focus on South America, Central Asia, Africa and Europe. Has been a principal of three natural resources companies: exploration in Suriname gold (Sumin Resources); production of fertilizer (Uzbekistan); and an 8,000 tpa copper cathode production company in the US (Idaho).

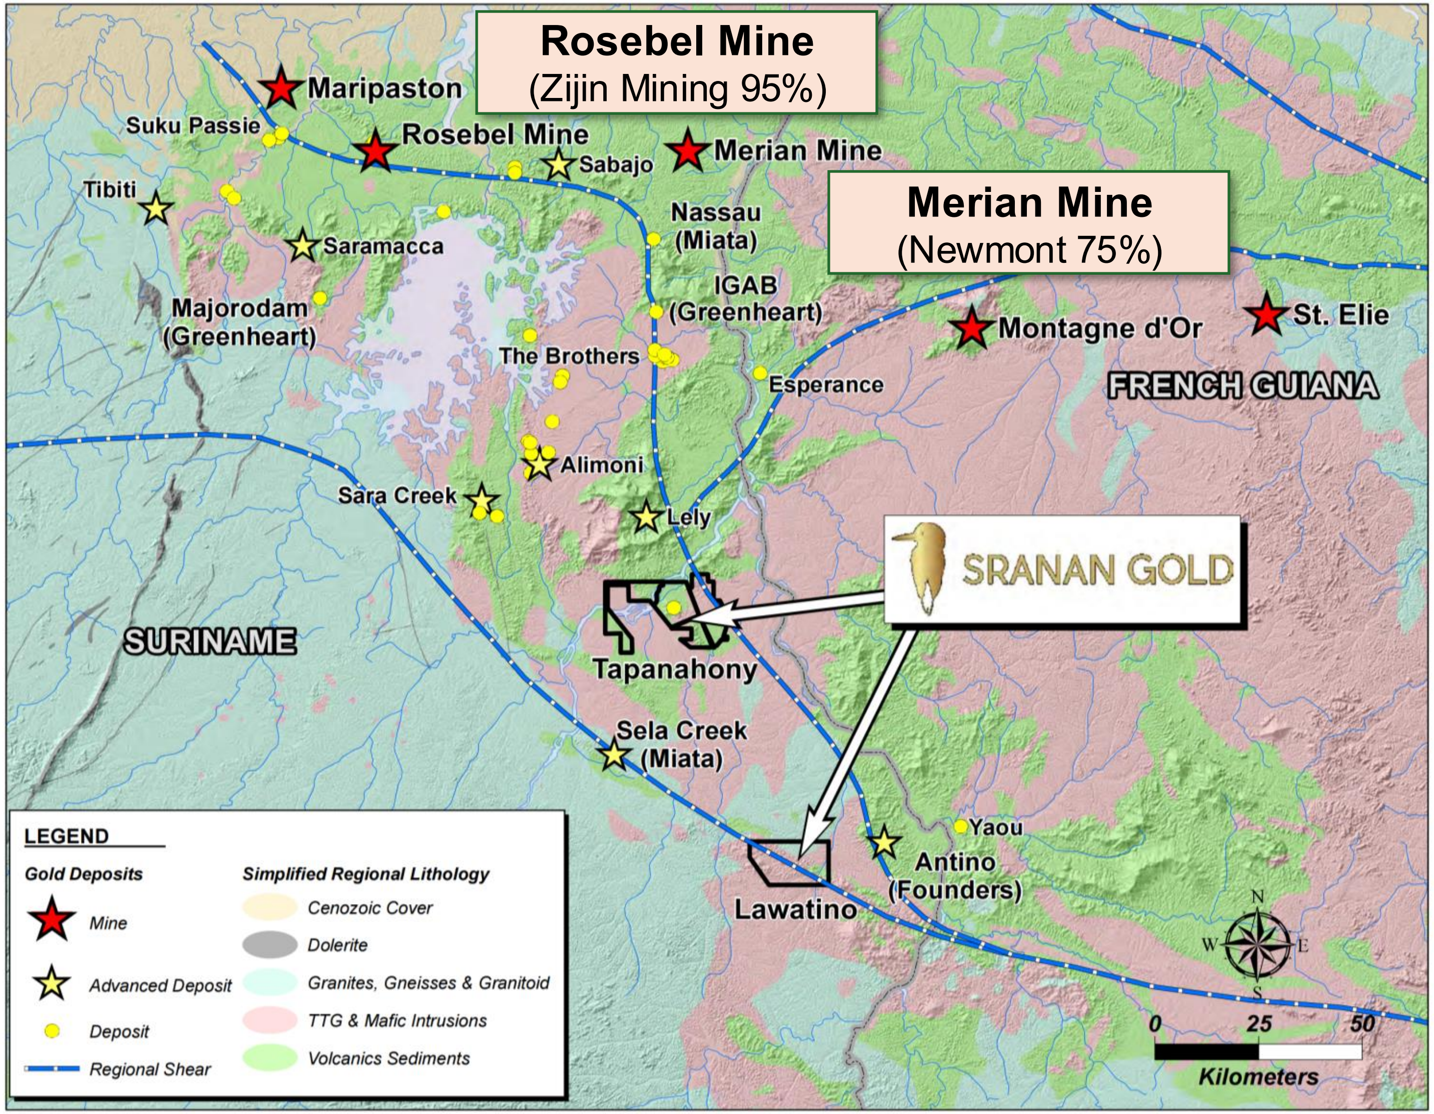
**Ron Shenton**
**Independent Director**

Capital markets professional with 40 years of experience, beginning as an investment advisor at a national brokerage firm before moving to a regional platform. Founder of multiple public companies, he has served as CEO and director, led investor and public relations, and raised growth capital across sectors - primarily mining exploration, with additional experience in biotech, cybersecurity, technology, and oil and gas.

# Guiana Shield – Sranan Project Locations

The Guiana Shield hosts world-class, gold producing greenstone belt with two major operating gold mines:

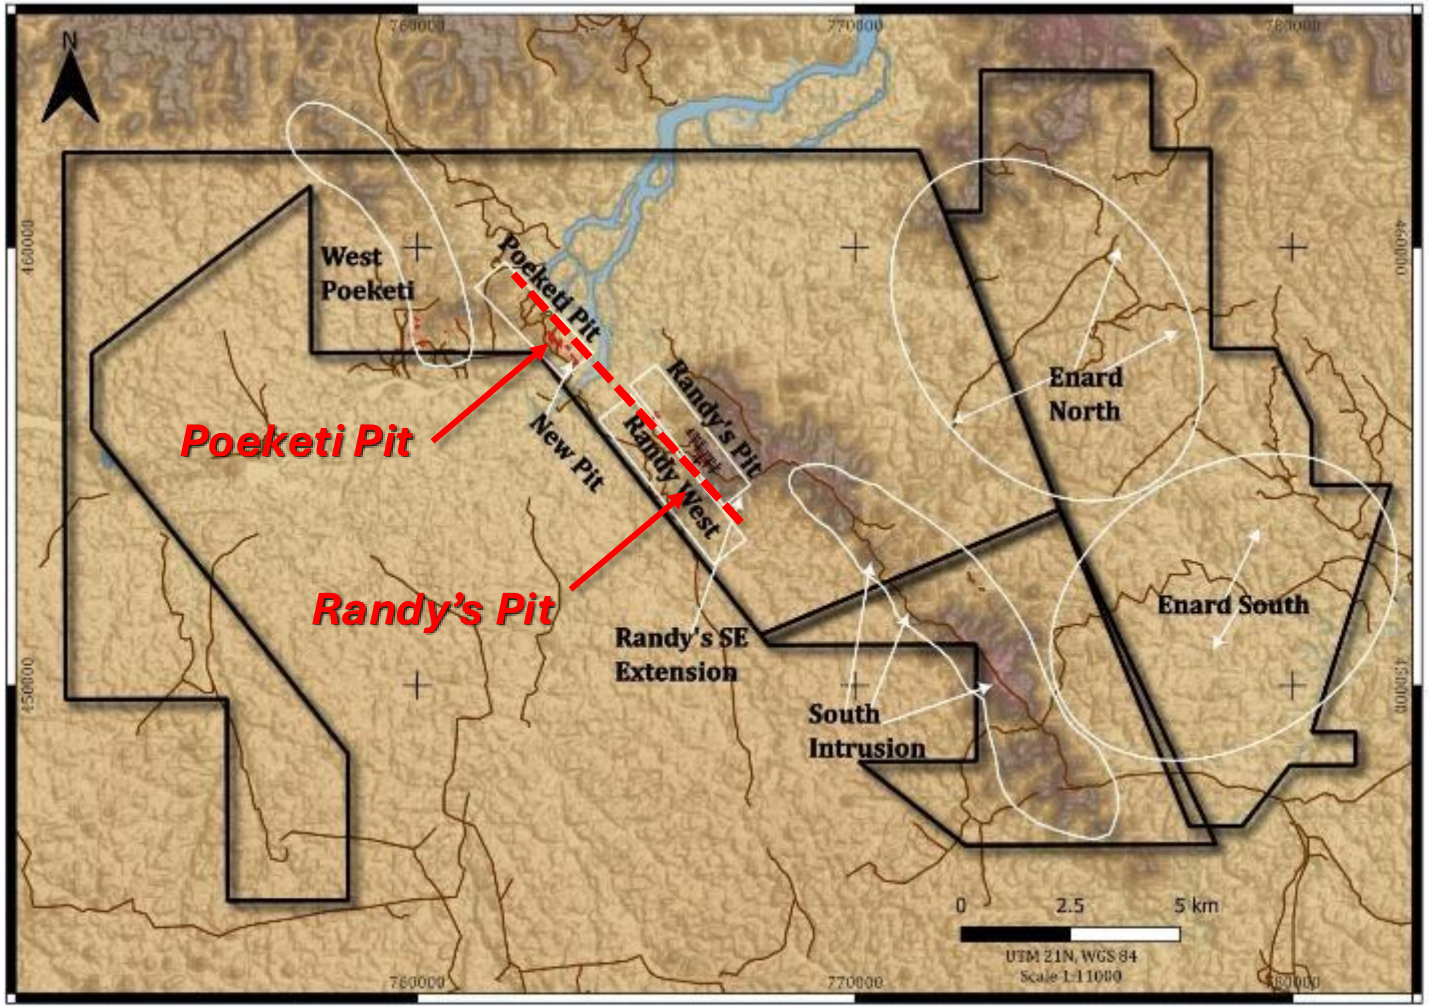
- **MERIAN MINE (75% Newmont & 25% Staatsolie Maatschappij Suriname N.V.)**
  - Commenced commercial production in 2016 with ~3.5 Moz Au produced as of Q1 2026
  - Reserves of 4.5 Moz at 1.09 g/t Au (Newmont, December 2025)
  - Initially discovered in 2003
- **ROSEBEL MINE (95% Zijin Mining & 5% Surinamese State entity)**
  - Commercial production started in 2004 with ~6.5 Moz Au produced as of year-end 2025
  - Reserves of 5.1 Moz Gold at 0.78 g/t Au (Zijin December 2025)
  - R. Bhoelan, Sranan's VP Exploration, involved in the resource development of Saramacca Mine, 25 km from Rosebel



# Tapanahony Gold Project

# Tapanahony Gold Project

- 29,000 ha Tapanahony Project covers one of Suriname's most productive artisanal mining districts
- Small-scale gold mining from 2021 to 2025 focusing on high grade, shear-zone hosted gold.
- Sranan diamond drilling program commenced in August 2025
- Randy's Pit - initial focused drilling activities
  - 6,300 m of drill assay results reported
- Poeketi Pit - artisanal mining activities accelerated in late 2025
- Poeketi Pit - mobilized second drill rig in April 2026 with assay results pending.



# Tapanahony: Exploration History

**Over US$10 million has been spent in the past on exploration at Tapanahony**

## 1980s

**United Nations Revolving Fund for Natural Resources (UNRF)** supported drainage and soil geochemistry studies, which reported elevated gold values in soils (>100 ppb and locally >1,000 ppb gold) at Tapanahony

## 1993-1997

**Golden Star Resources** conducted exploration with a pan sampling program, 1-metre shallow auger holes, followed by deep auger holes

## 2008-2012

**IAMGOLD** conducted multi phase exploration program culminating with drill program yielding positive results

## 2020-2021

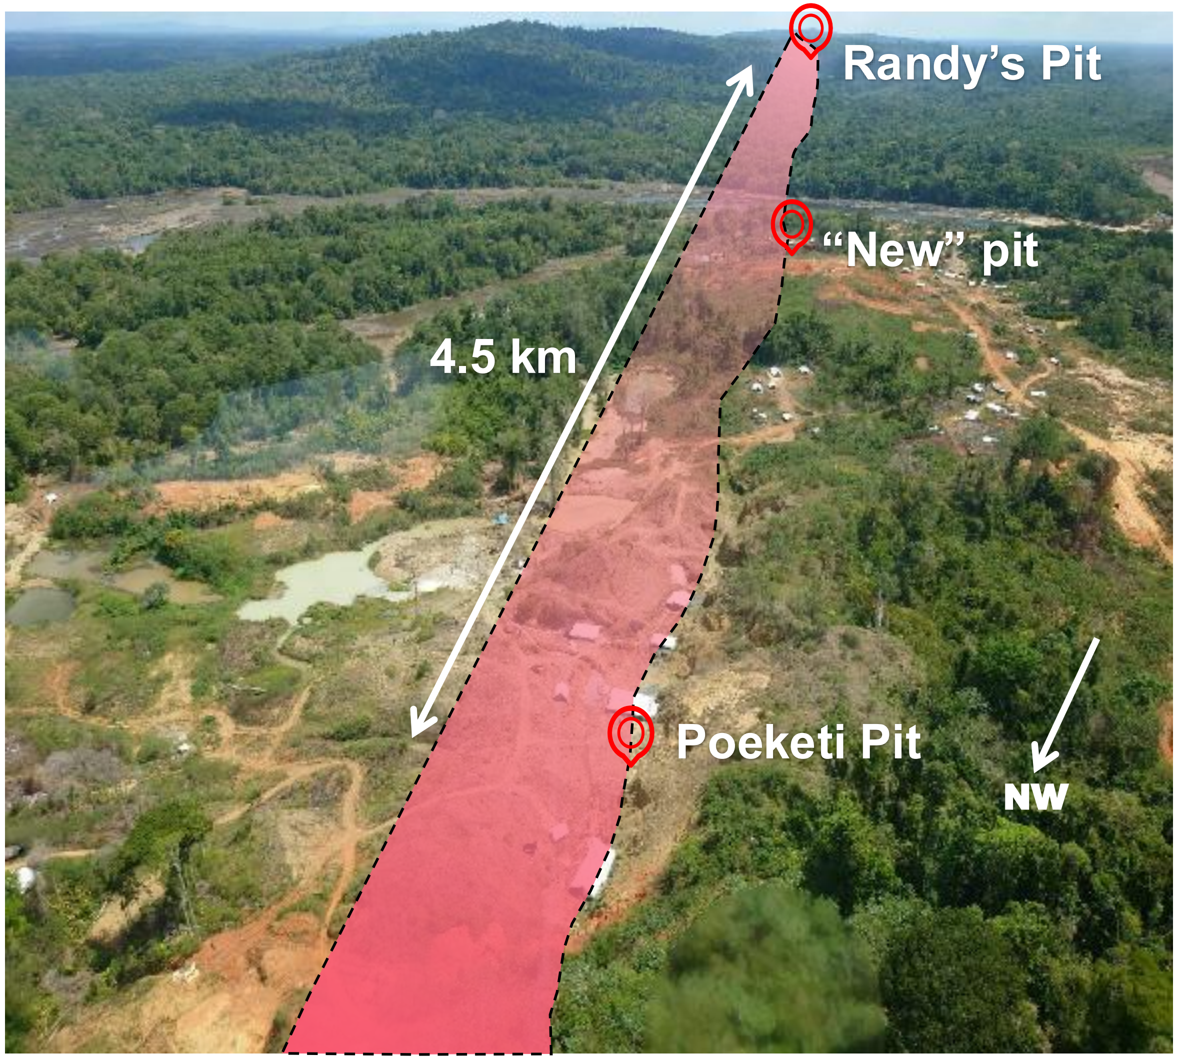
Concession owner commences mining in saprolites and prepares 43-101 Technical Report

## 2024 - present

**Sranan Gold**
**2025 - commences exploration including diamond drilling**

# Tapanahony: Poeketi Pit and Randy's Pit Drill Targets

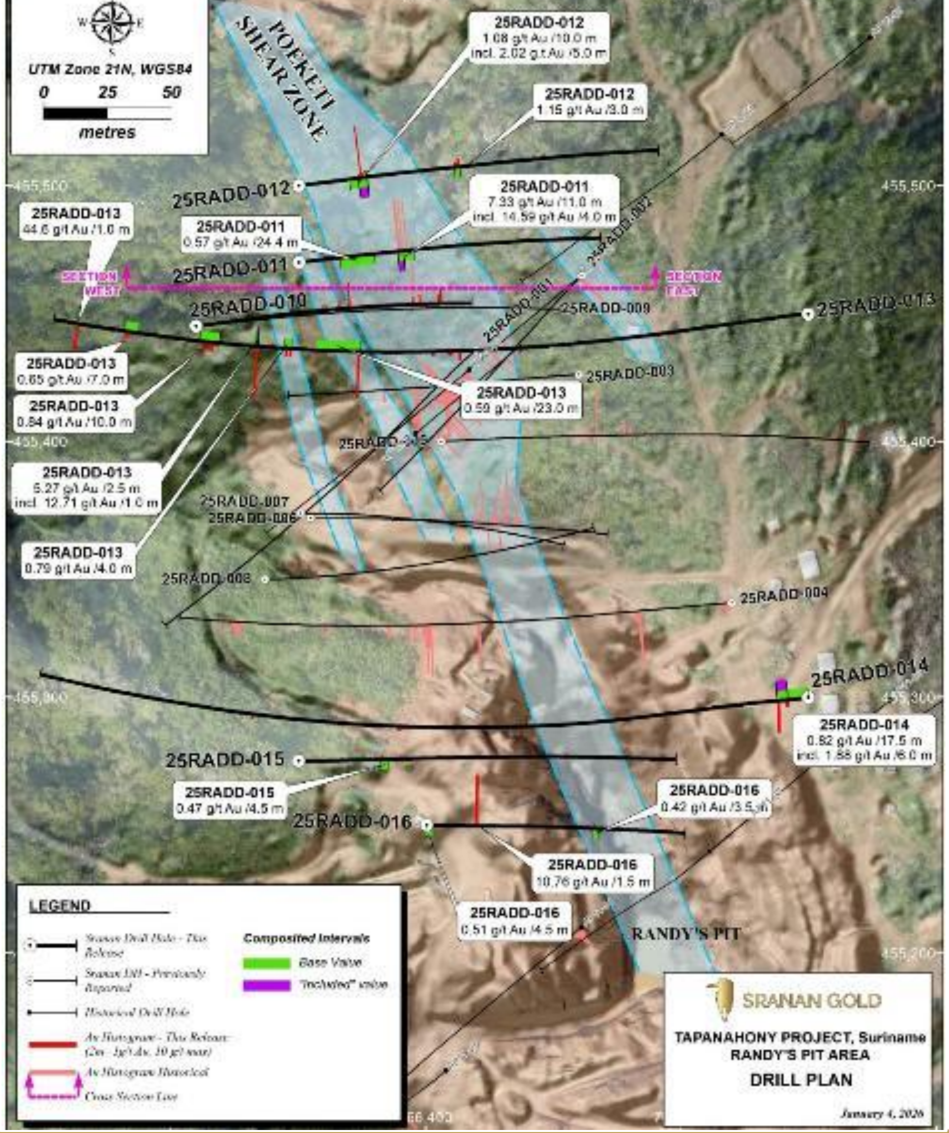
- Gold-bearing shear zone extending over 4.5 km and open along strike.
- Extensive active pits and shallow underground mines operated by artisanal miners along surface of the shear zone
  - Mining high-grade gold mineralization hosted in quartz veins
- Initially targeted the Randy's Pit Zone with first drill hole returning 11.5 m @ 3.64 g/t Au.
- Randy's Pit drill assay highlights include:
  - 64 m grading 3.00 g/t Au (25RADD-004)
  - 11.0 m grading 7.33 g/t Au incl. 14.59 g/t Au over 4.0 m (25RADD-011)
- 2nd drill rig mobilized and targeting the Poeketi Pit / "New" Pit along trend 4.5 km NW of Randy's Pit



# Tapanahony: Randy’s Pit Drill Assay Highlights

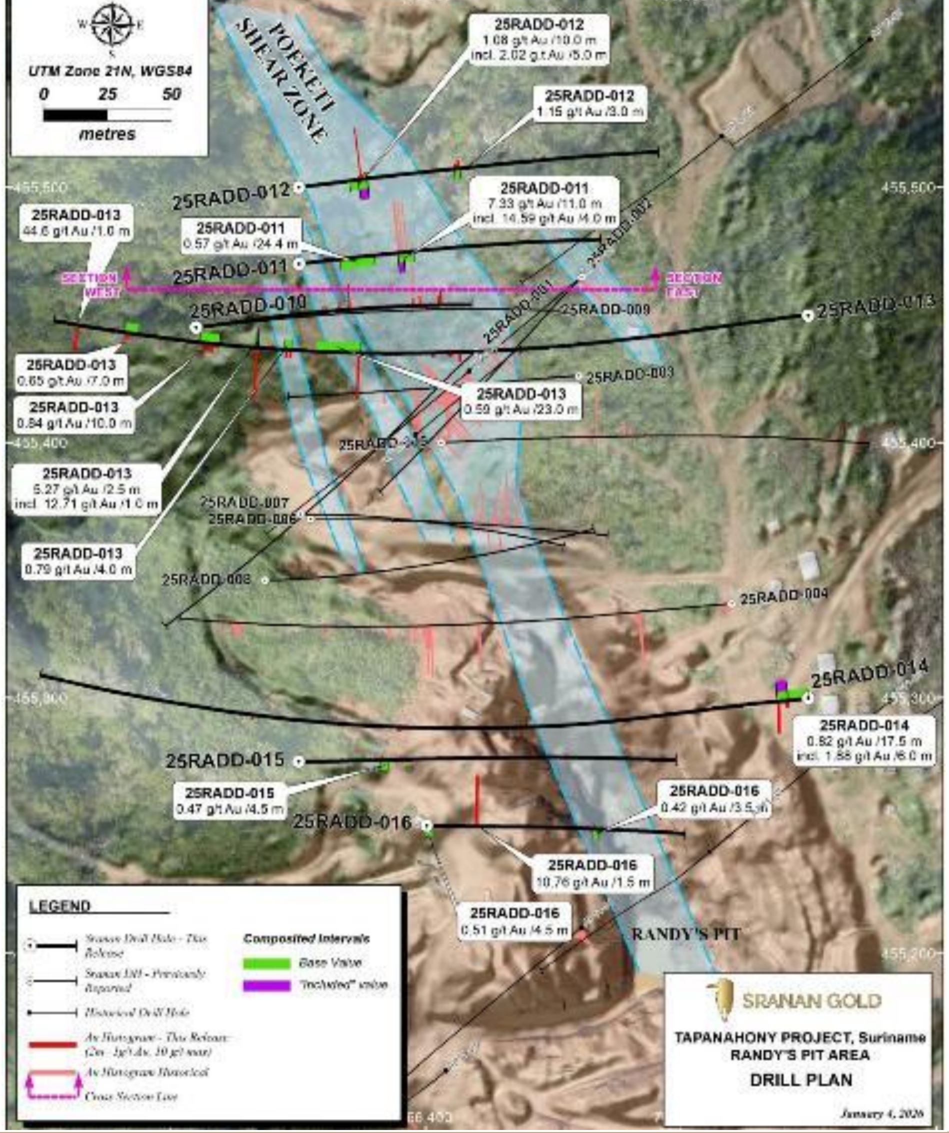
| Hole ID | From (m) | To (m) | Interval (m) | Au (g/t) |
|---|---|---|---|---|
| **25RADD-001** | 23.0 | 34.5 | 11.5 | 3.64 |
| | 29.1 | 30.5 | 1.4 | 21.10 |
| **25RADD-002** | 117.5 | 131.0 | 13.5 | 1.80 |
| **25RADD-003** | 72.0 | 77.0 | 5.0 | 5.60 |
| | 85.0 | 95.5 | 10.5 | 2.70 |
| **25RADD-004** | 51.0 | 54.6 | 3.6 | 7.90 |
| | 161.0 | 225.0 | 64.0 | 3.00 |
| *including* | 164.0 | 181.0 | 17.0 | 10.5 |
| **25RADD-005** | 73.5 | 85.5 | 12.0 | 1.31 |
| **25RADD-006** | 91.6 | 114.0 | 22.4 | 2.44 |
| **25RADD-007** | 144.0 | 150.0 | 6.0 | 3.82 |
| **25RADD-008** | 138.0 | 146.5 | 8.5 | 1.77 |
| **25RADD-009** | 114.0 | 133.0 | 19.0 | 1.68 |
| **25RADD-010** | 194.0 | 197.0 | 3.0 | 1.74 |
| **25RADD-011** | 28.6 | 53.0 | 24.4 | 0.57 |
| | 69.0 | 80.0 | 11.0 | 7.33 |
| *including* | 69.0 | 73.0 | 4.0 | 14.59 |
| **25RADD-012** | 29.0 | 39.0 | 10.0 | 1.08 |
| **25RADD-013** | 247.0 | 270.0 | 23.0 | 0.59 |
| | 389.5 | 390.5 | 1.0 | 44.6 |
| **25RADD-014** | 0.0 | 17.5 | 17.5 | 0.82 |

*Note: weighted average Au grades are based on a 0.3 g/t Au cut-off grade with reported Intervals incorporating no greater than 10 m internal dilution below cut-off grade. Reported Intervals are downhole lengths and do not represent true widths or thickness. True widths are likely to range from about 50% to >85% depending upon the interpretation of the mineralized zones.*



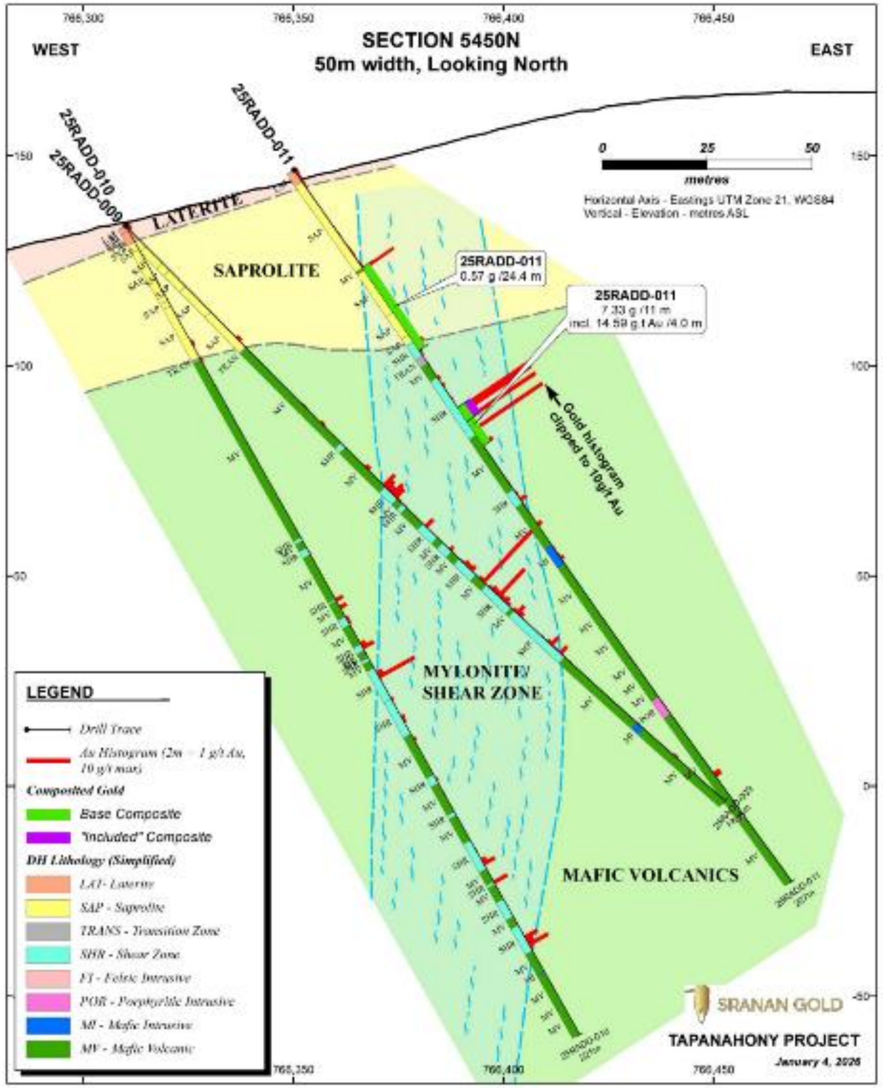
# Tapanahony: Randy’s Pit Drill Assay Highlights

| Hole ID | From (m) | To (m) | Interval (m) | Au (g/t) |
|---|---|---|---|---|
| **25RADD-016** | 29.5 | 31.0 | 1.5 | 10.76 |
| **25RADD-018** | 10.5 | 12.0 | 1.5 | 2.52 |
| | 37.0 | 38.0 | 1.0 | 10.88 |
| **25RADD-019** | 19.0 | 21.0 | 2.0 | 4.36 |
| *Including* | 19.0 | 20.0 | 1.0 | 6.77 |
| **26RADD-021** | 115.0 | 119.0 | 4.0 | 6.58 |
| *Including* | 115.0 | 116.0 | 1.0 | 21.80 |
| **26RADD-022** | 6.5 | 16.6 | 10.1 | 0.96 |
| | 114.0 | 119.0 | 5.0 | 2.24 |
| *Including* | 114.0 | 117.0 | 3.0 | 3.42 |
| **26RADD-023** | 99.0 | 107.0 | 8.0 | 1.73 |
| *Including* | 106.0 | 107.0 | 1.0 | 12.53 |
| | 125.0 | 155.0 | 30.0 | 0.67 |
| *Including* | 150.0 | 153.0 | 3.0 | 3.78 |
| **26RADD-025** | 92.5 | 112.5 | 20.00 | 1.33 |
| **26RADD-026** | 68.0 | 75.5 | 7.5 | 1.22 |
| **26RADD-027** | 40.5 | 55.5 | 15.0 | 0.47 |



*Note: weighted average Au grades are based on a 0.3 g/t Au cut-off grade with reported Intervals incorporating no greater than 10 m internal dilution below cut-off grade. Reported Intervals are downhole lengths and do not represent true widths or thickness. True widths are likely to range from about 50% to >85% depending upon the interpretation of the mineralized zones.*

# Tapanahony: Randy's Pit - Cross Section 5450N



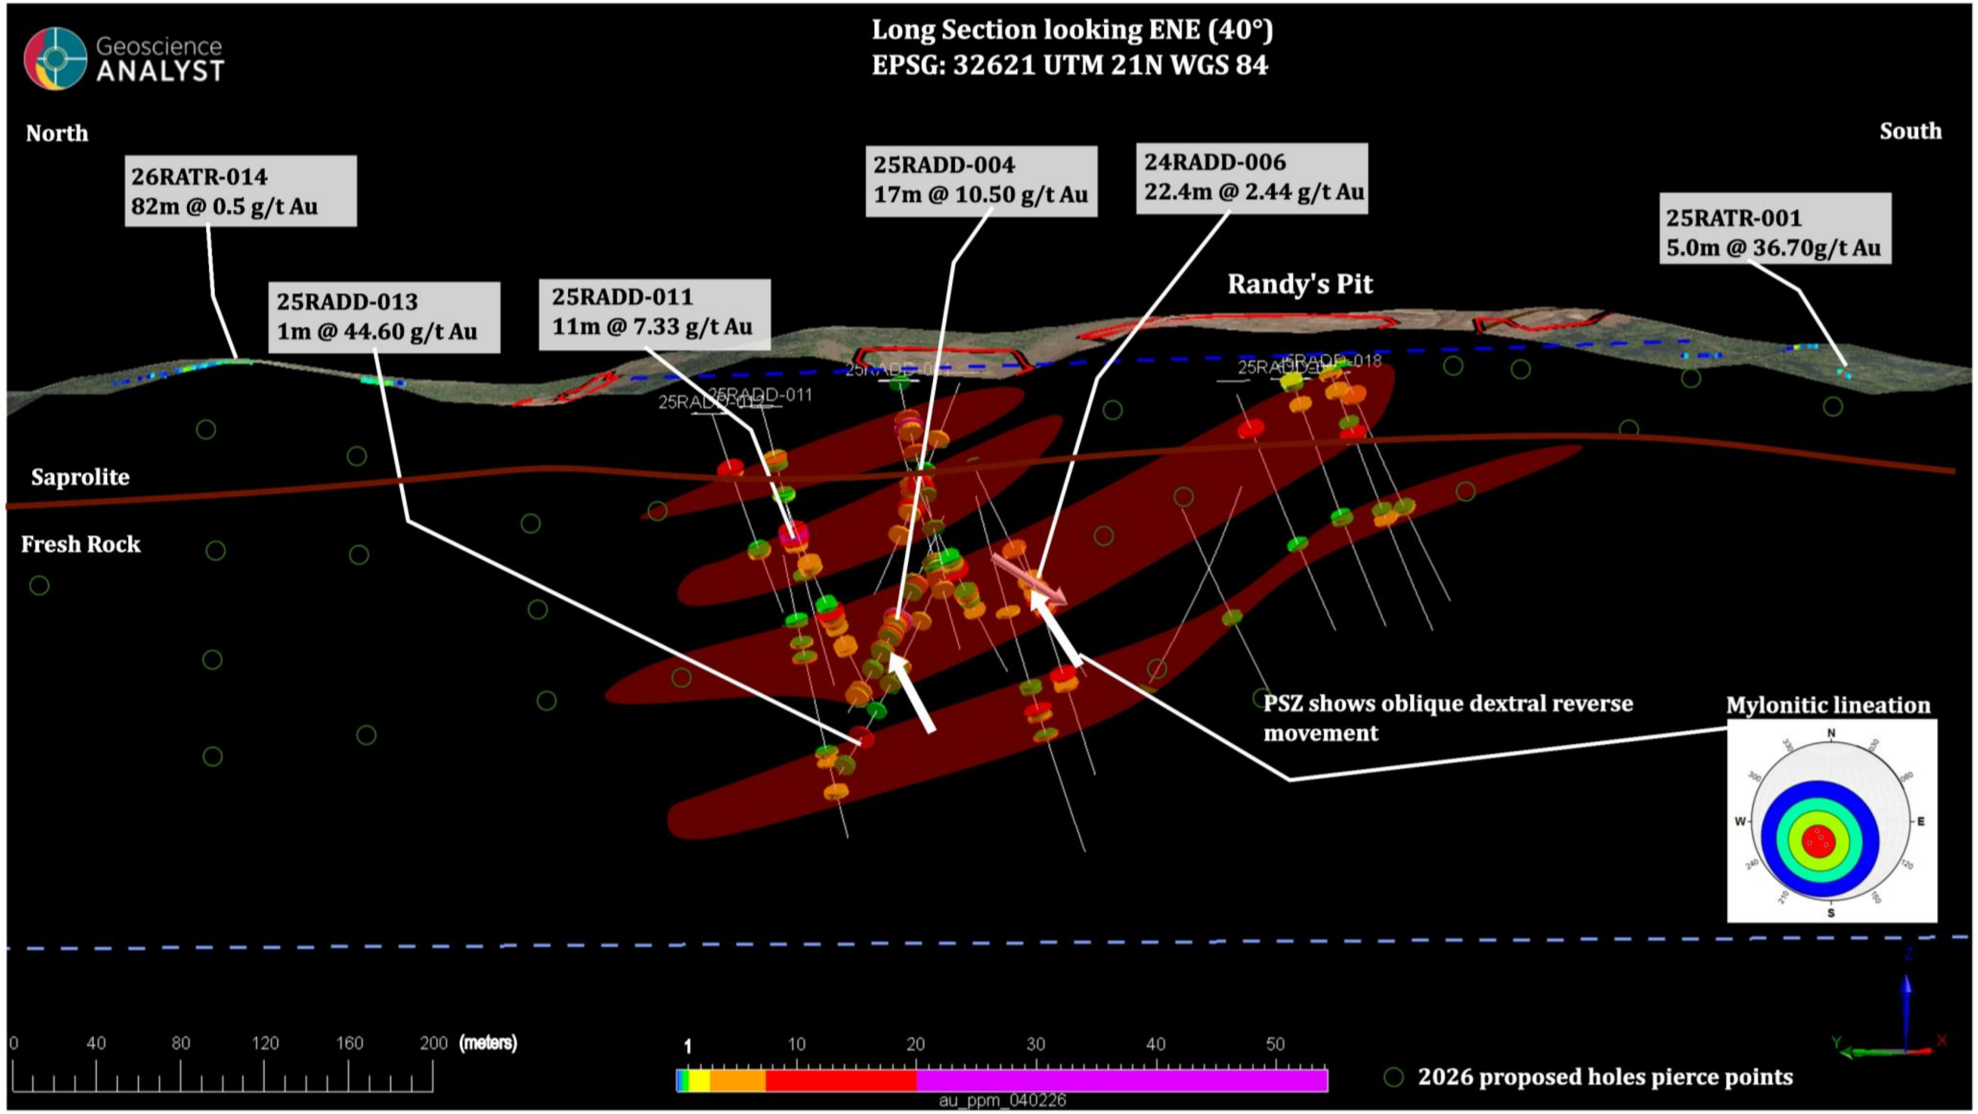
- Gold mineralization traced 200 m below surface
- Hosted in silicified sheared/mylonitic basalts with visible gold
- 50 m thick saprolite is the focus of artisanal U/G mining

| SECTION 5450 N HIGHLIGHTS | | | | |
|---|---|---|---|---|
| **Hole ID** | **From (m)** | **To (m)** | **Interval (m)** | **Au (g/t)** |
| **25RADD-009** | 114.0 | 133.0 | 19.0 | 1.68 |
| **25RADD-010** | 194.0 | 197.0 | 3.0 | 1.74 |
| **25RADD-011** | 28.6 | 53.0 | 24.4 | 0.57 |
| *and* | 69.0 | 80.0 | 11.0 | 7.33 |

- Poeketi Shear Zone extends from the Randy's Pit 4.5 km to the northwest and the Poeketi gold zone
- Mineralization remains open

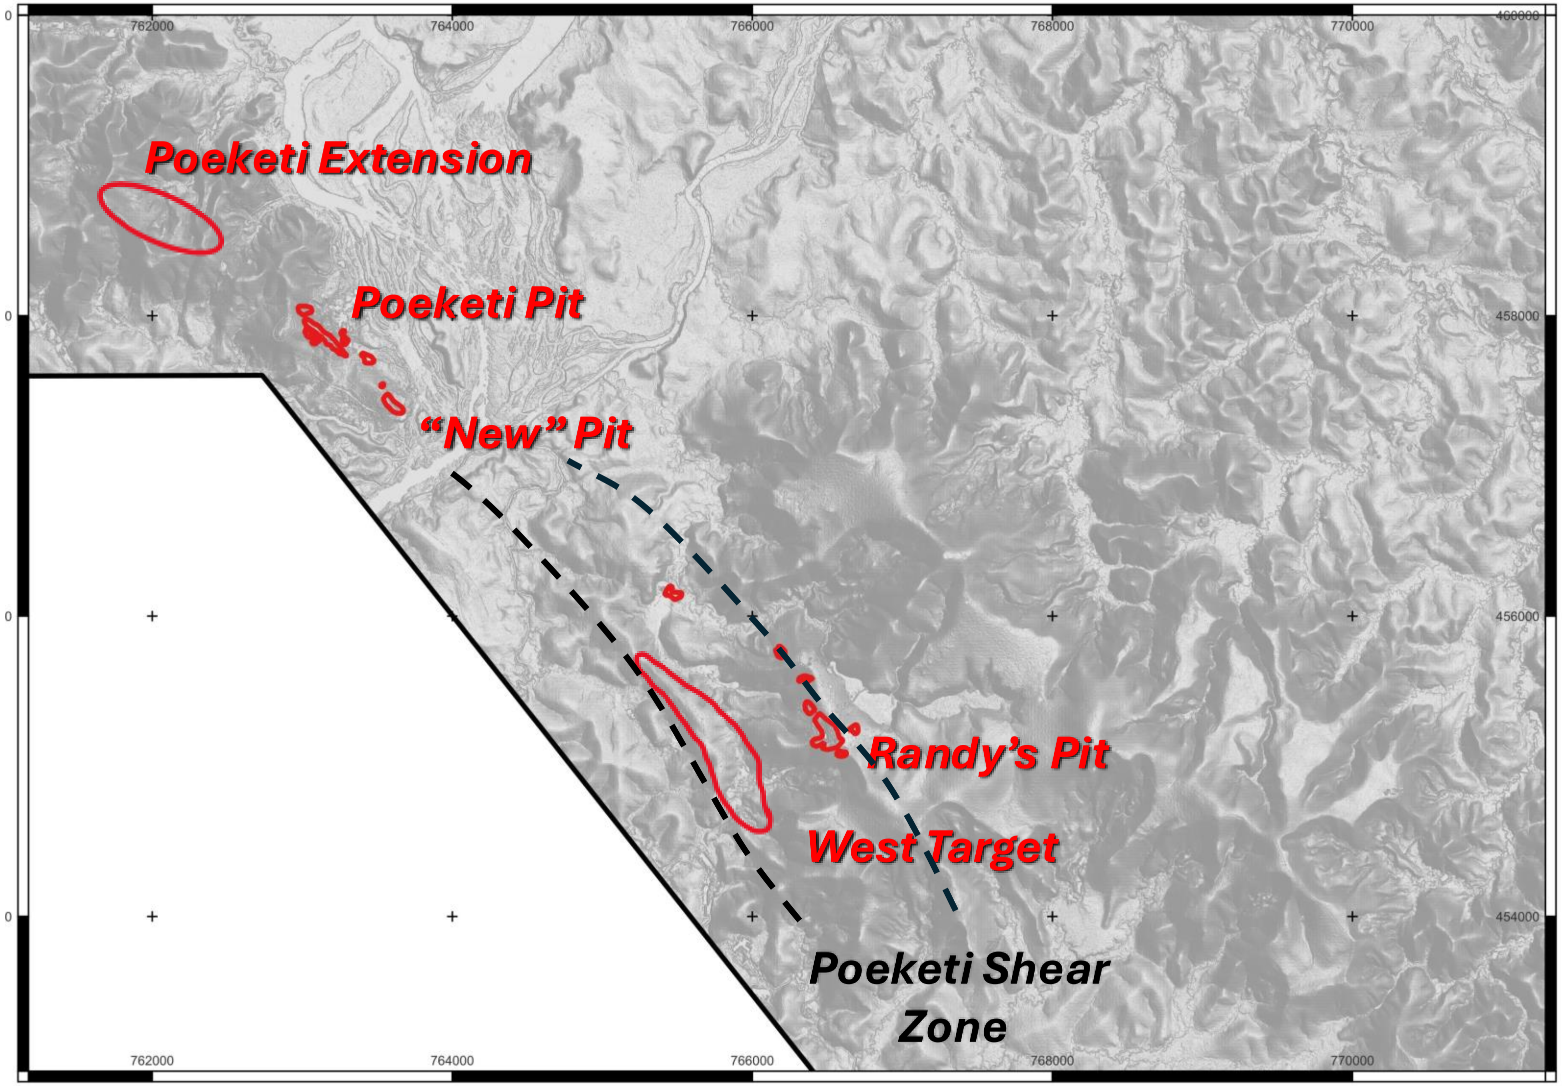
*Note: weighted average Au grades are based on a 0.3 g/t Au cut-off grade with reported Intervals incorporating no greater than 10 m internal dilution below cut-off grade. Reported Intervals are downhole lengths and do not represent true widths or thickness. True widths are likely to range from about 50% to >85% depending upon the interpretation of the mineralized zones.*

# Tapanahony: Randy’s Pit Zone Long Section



- Poeketi Shear Zone (PSZ) is mylonite within folded and strained basalt
- PSZ is an oblique dextral reverse shear zone
- High-grade lenses are dipping NW along shear fabric
- PSZ shows progressive strain with pre- and post-shear extensional vein sets
- Visible gold often seen along shear planes

# Tapanahony: Additional Exploration Targets Identified



While current focus is on drilling the Randy's, Poeketi, and "New" pits, numerous additional targets have been identified from:

- Geological mapping
- Geochemical sampling
- LiDAR survey
- Historical exploration data
- Airborne magnetics

Targets will be field tested during 2026

# Tapanahony: Drilling Update (August 2026)

**POEKETI PIT DRILLING**

- 12 holes completed at the Poeketi Zone – assays pending
- Drilling tests a ~1 km mineralized corridor where artisanal miners extract high-grade coarse gold from pits and shallow underground workings
- Gold hosted in silicified zones and quartz veins with sulphides within sheared basalts
- Diamond drilling continues

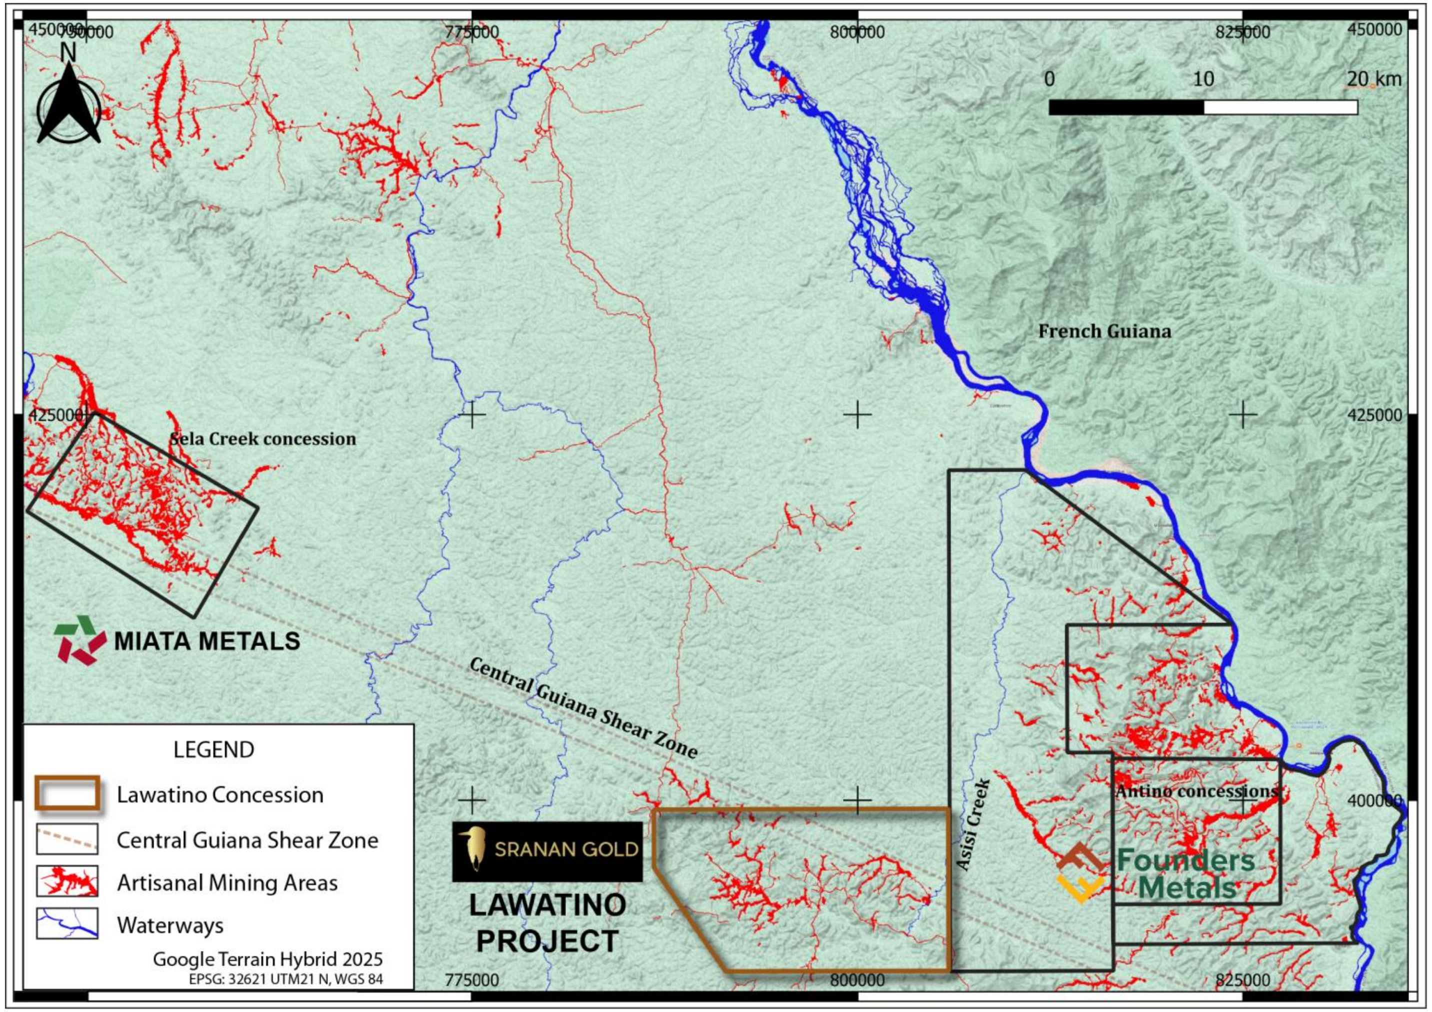
**RANDY'S PIT DRILLING**

- 10 additional holes completed at Randy's Pit – assays pending
- Randy's Pit mineralization traced over 800 m along the Poeketi Shear Zone
- Mineralization remains open along strike and to depth

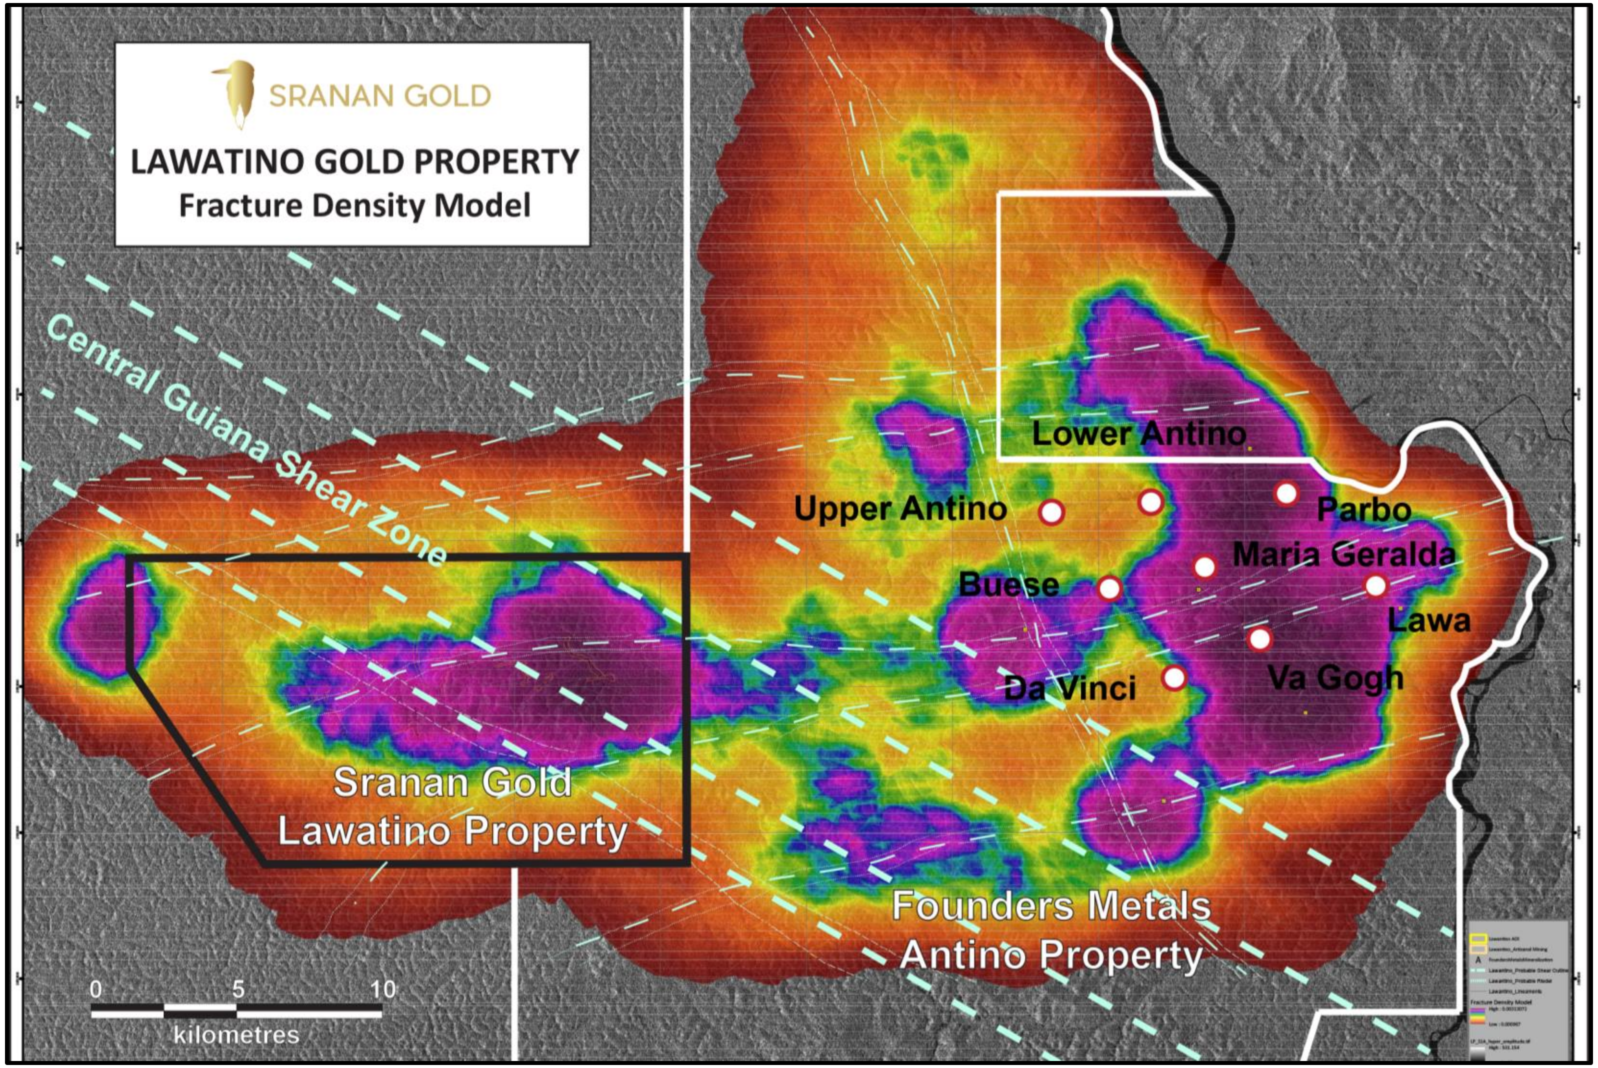
# Lawatino Gold Project

# Lawatino Gold Project – Sranan's Newest Acquisition

- 18,468 ha of highly prospective land
- Located along the Central Guiana Shear Zone (CGSZ)
- CGSZ influenced mineralization at Founders Metals' Antino and Miata Metals' Sela Creek projects
- Extensive artisanal mining within Lawatino's boundaries
- Field work has commenced
  - Fracture Density Model recently completed
  - Field crews mobilized - geological mapping, soil sampling, trenching and channel sampling
  - Recent reconnaissance sampling returned numerous +1 g/t Au results including:
    - 101.5 g/t Au & 15.7 g/t Au

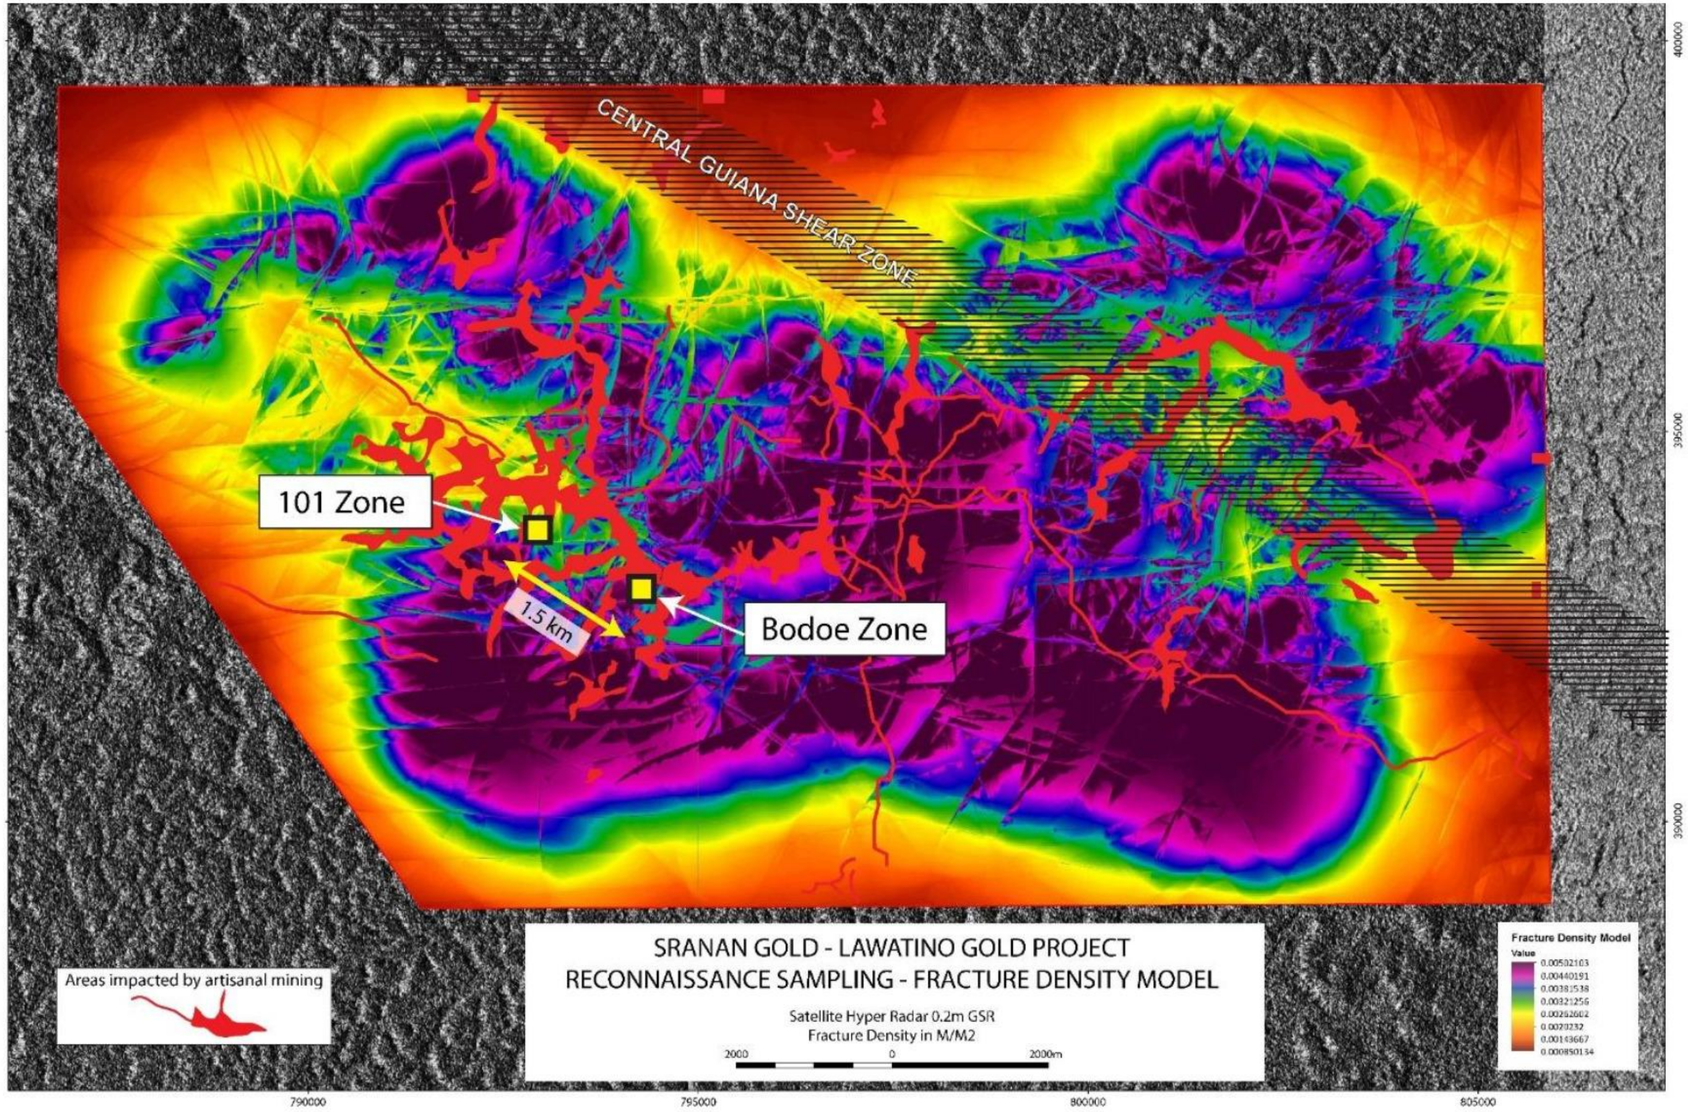


# Lawatino – Regional Fracture Density Model



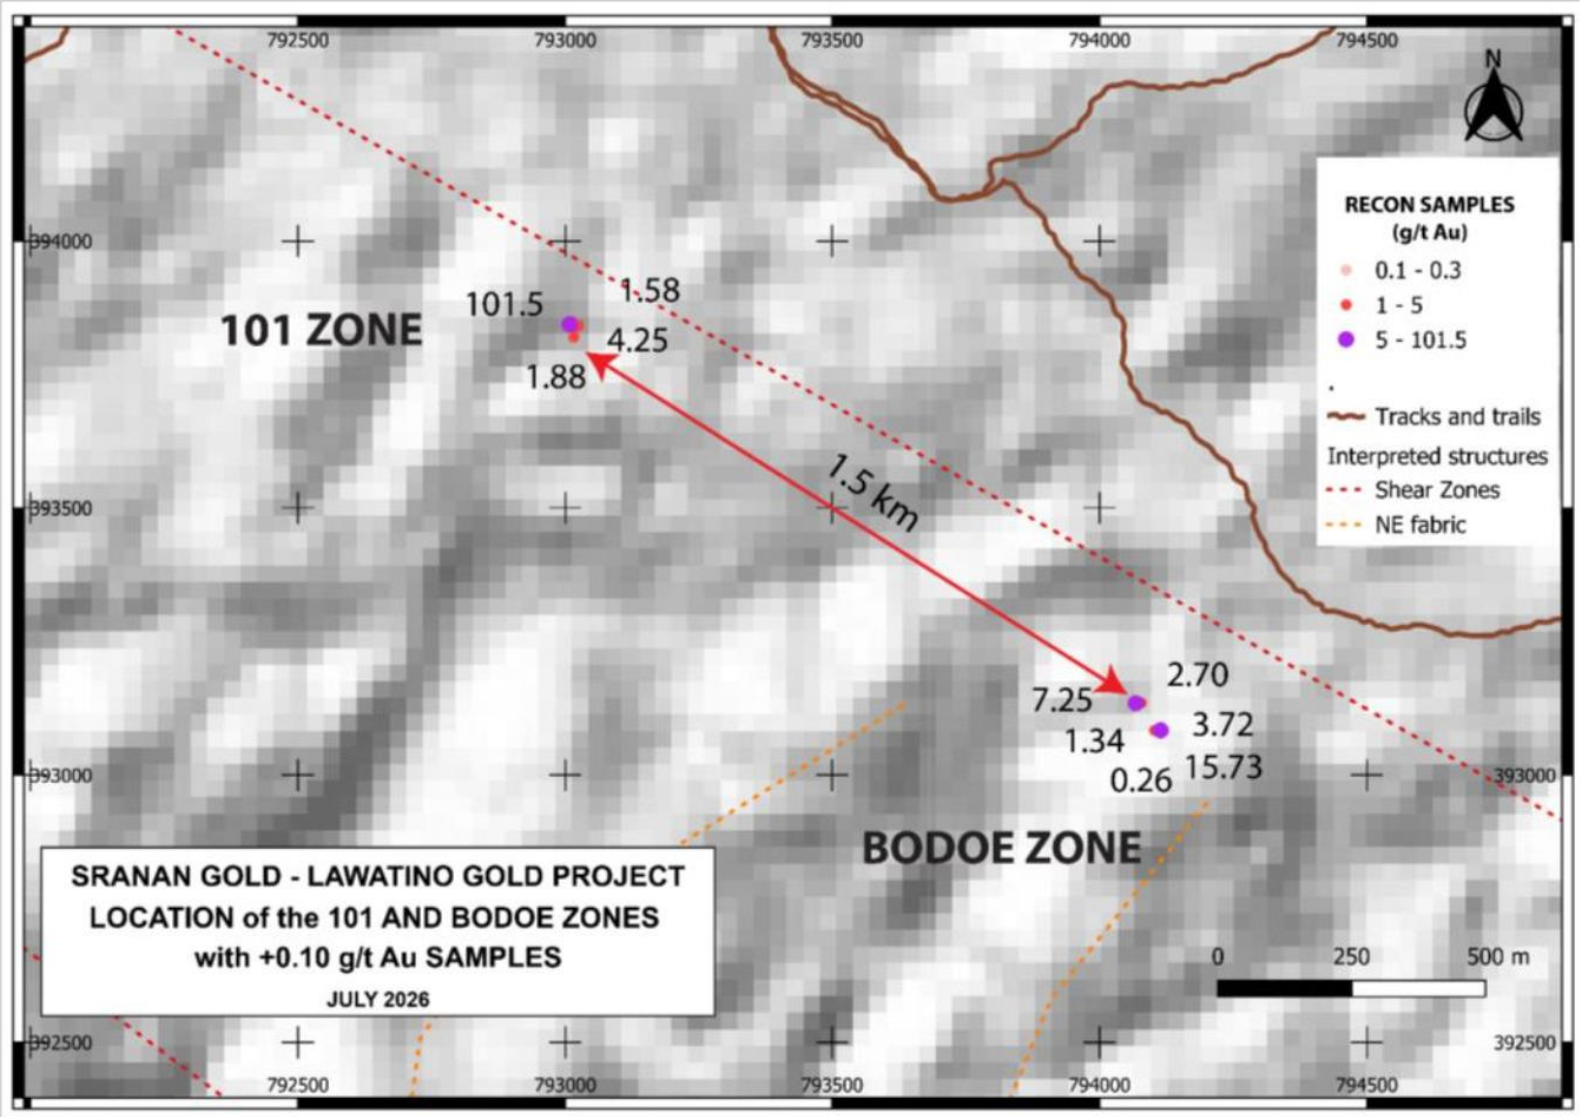
- Regional Fracture Density Map
  - MUD® SAR Technology
- Maps the density of fractures in potential host rocks
- CGSZ plays a role in the deposition of gold at the Sela Creek prospect (Miata) and the Antino deposits (Founders).
- CGSZ cuts across Lawatino

# Lawatino – Fracture Density Model

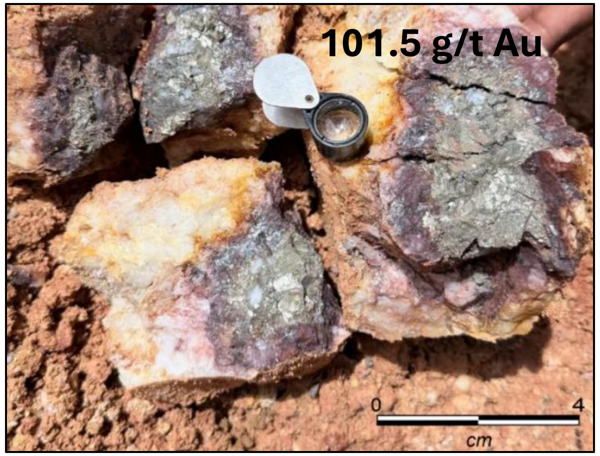


- Detailed fracture density map showing potential structure controls for gold deposition
- Purple areas represent the highest fracture density
- Areas of alluvial mining (red) correlate directly to areas or downstream from areas of high fracture density
- NW-SE linears correspond to the CGSZ

# Lawatino – Initial Sampling Outlines New Au Zones



- Initial results from 43 reconnaissance samples returned 11 samples +1 g/t Au (25% of samples)
- Two new zones identified 1.5 km apart related to areas of historical alluvial mining
- Hydraulic shovel has been mobilized - cutting trenches across the new zones and on 250 m step outs



# Lawatino – Trenching Sampling @ 101 and Bodoe Zones

# 2026 Exploration Activities - Looking Ahead

## Tapanahony Gold Project

### Drilling Continues

- **Randy's Pit** – continue to trace the mineralized shear zone north and south of the Randy's Pit
- **Poeketi Pit** – 5,000 metres of drilling planned
- **Property Exploration** – continue mapping, sampling and trenching the "additional" targets area. Ground proofing in preparation for drilling

## Lawatino Gold Project

### Preparing for Drilling

- Geological mapping, soil auger sampling, and sampling on exposures and trenches
- Logistics and mobilization for drilling equipment and associated facilities
- Remote sensing and airborne geophysics

## New Project Reconnaissance

# Sranan Gold Investment Highlights

2 highly prospective gold projects in Suriname established gold belts

Highly experienced management team with a long history of exploration activities in Suriname

Active exploration programs supplying a steady flow of news

- Diamond drilling at Tapanahony
- Trenching and geological sampling at Lawatino in preparation for drilling in late 2026

| Sranan - Capital Structure | Shares *(millions)* |
